INTERNATIONAL JOURNAL OF OPTOELECTRONICS, 1991, VOL. 6, NO. 6, 591–593

# INDEX OF AUTHORS (WITH TITLES)

## VOLUME 6

Ankiewicz, A., and Peng, G-D.: Soliton interaction in optical fibre couplers 15
Baldini, F., *see* Falciai, R.
Barr, S. A., *see* Stevenson, A. J.
Bechi, P., *see* Falciai, R.
Bennion, I., *see* Wade, C. A.
Bergner, H., Brückner, V., Lenzner, M., Li, H., and Strobel, R.: Influence of field-dependent carrier mobility and surface preparations of GaAs samples in optoelectronic switching experiments . . . . . 357
Betts, R. A., Rühl, F. F., Kwok, T. M., and Zheng, G. F.: Optical amplifiers based on phosphorus co-doped rare-earth-doped optical fibres . . . 47
Blanc, F., *see* Boisde, G.
Boisde, G., Blanc, F., and Machuron-Mandard, X.: pH measurements with dyes co-immobilization on optodes: principles and associated instrumentation 407
Brückner, V., *see* Bergner, H.
Bryant, G. W., Paton, A. T., Scott, J. C., and Stuart, A. D.: Assessment of special fibres for distributed anti-Stokes Raman ratio thermometry . . 91
Calderhead, R. G., *see* Moore, K. C.
Chiang, K. S.: Theory of channel optical waveguides . . . . . 3
Chu, B. C. B., Newson, T. P., Gerges, A. S., and Jackson, D. A.: An optically-addressed vortex-shedder flow-meter . . . . . 319
Chu, P. L., *see* Wong, D.
Clark, C., *see* Hale, K. F.
Clark, D. F., *see* Stewart, G.
Cockshott, C. P.: Developments in optical sensors for use in vehicles . . . 285
Cogswell, C. J., *see* Sheppard, C. J. R.
Cosi, F., *see* Falciai, R.
Cubeddu, R., Docchio, F., Ramponi, R., and Taroni, P.: Laser-induced fluorescence in biomedical applications . . . . . 479
Culshaw, B., *see* Stewart, G.
Cusworth, S. D., *see* Senior, J. M.
Das, P., *see* De Cusatis, D.
De Cusatis, D., Das, P., and Litynski, D. M.: A generalized, programmable integrated optical matrix processor using frequency multiplexed SAW acousto-electro-optic effect . . . . . 265
Dickinson, G.: Optical sensing techniques in flowmetering . . . . . 305
Ding, J. Y., Shahriari, M. R., Sigel, G. H., Jr.: Developments of high temperature humidity sensors based on porous optical fibres . . . . . 385
Docchio, F., *see* Cubeddu, R.
Dragila, R., and Vukovic, S.: Surface wave polarizer for optical fibres . . 35
Drizlikh, S., Zur, A., and Katzir, A.: The use of multichannel infrared fibre optic sensors for controlled microwave heating . . . . . 451
Duggan, R. F., *see* Hale, K. F.
Edwards, P. J.: Sub-Poisson light from GaAlAs infrared emitting diodes . . 23
Eftimov, T., Kortenski, T., and Vulkova, T.: Investigation of optical tapers by means of selective mode excitation . . . . . 553
Elias, M. C., and Strach, S. J.: OSNET™—an engineered fibre-optic sensing system for industrial applications . . . . . 145
Falciai, R., Baldini, F., Bechi, P., and Cosi, F.: *In vivo* entero-gastric reflux detection by optical fibres . . . . . 443
Ferreira, M., Hamidi, S., Shan, X., Siddiqui, A. S., Siddiqui, Z. S., and Simeonidou, D.: A new delayed self-homodyne technique for laser spectral linewidth measurement . . . . . 585

Ferriere, R., *see* Goedgebuer, J.-P.
Gal, M., *see* Xu, Z. Y.
Gaughan, K., *see* Xu, Z. Y.
Gerges, A. S., *see* Chu, B. C. B.
Ginzberg, V. M.: On the potential of human vision systems and anthropomorphic technical systems . . . . . 253
Goedgebuer, J.-P., Porte, H., and Ferriere, R.: Recent advances in electro-optic coherence multiplexing . . . . . 339
Grattan, K. T. V., *see* Kurata, J.
Hale, K. F., Clark, C., Duggan, R. F., and Jones, B. E.: Incremental control of a valve actuator employing optopneumatic conversion . . . . . 539
Hamidi, S., *see* Ferreira, M.
Hills, P. C., *see* Samson, P. J.
Horridge, G. A., and Sobey, P.: An artificial seeing system copying insect vision 177
Jackson, D. A., *see* Chu, B. C. B.
Johnston, P. R., *see* Tjin, S. C.
Jones, B. E., and Spooncer, R. C.: Differential-pressure transmitter with fibre-optic links using wavelength modulation . . . . . 333
Jones, B. E., *see* Hale, K. F.
Katzir, A., *see* Drizlikh, S.
Kilpatrick, D., *see* Tjin, S. C.
King, T. A., *see* Turton, B. C. H.
Kortenski, T., *see* Eftimov, T.
Kurata, J., Grattan, K. T. V., Uchiyama, H., and Tanaka, T.: Measurement of a water surface using the image of a grating-edge detection using a Gaussian function . . . . . 395
Kwok, T. M., *see* Betts, R. A.
Lang, S. R., *see* Travis, A. R. L.
Lenzner, M., *see* Bergner, H.
Li, H., *see* Bergner, H.
Li, Ming-Jun, and Najafi, S. I.: Fully planar ion-exchanged glass channel waveguides with grating taps . . . . . 575
Litynski, D. M., *see* De Cusatis, D.
Machuron-Mandard, X., *see* Boisde, G.
Mohebati, A., *see* Turton, B. C. H.
Moore, K. C., and Calderhead, R. G.: The clinical application of low incident power density 830 nm GaAlAs diode laser radiation in the therapy of chronic intractable pain: a historical and optoelectronic rationale and clinical review 503
Najafi, S. I., *see* Li, Ming-Jun.
Najafi, S. I., *see* Wu, C.
Nakano, H., *see* Takahashi, Y.
Newson, T. P., *see* Chu, B. C. B.
Norris, J., *see* Stewart, G.
Numai, T.: Semiconductor wavelength tunable optical filters . . . . . 239
Paton, A. T., *see* Bryant, G. W.
Peng, G-D., *see* Ankiewicz, A.
Pini, R., *see* Salimbeni, R.
Porte, H., *see* Goedgebuer, J.-P.
Pratesi, R., *see* Salimbeni, R.
Ramponi, R., *see* Cubeddu, R.
Renner, H.: Anomalous wavelength dependence of microbending losses in single-mode fibres . . . . . 293
Rühl, F. F., *see* Betts, R. A.
Salimbeni, R., Pini, R., and Pratesi, R.: Biomedical applications of excimer lasers 459
Samson, P. J., and Hills, P. C.: Evaluation of a colour glass filter for extended distance fibre-optic temperature sensing . . . . . 83
Sceats, M. G., *see* Zhao, Y.
Scott, J. C., *see* Bryant, G. W.

Senior, J. M., and Cusworth, S. D.: Wavelength division multiplexed optical-fibre sensor systems and networks . . . . . 521
Shahriari, M. R., *see* Ding, J. Y.
Shan, X., *see* Ferreira, M.
Sheppard, C. J. R., and Cogswell, C. J.: Hybrid optical/electronic imaging systems 165
Shiers, D. B., *see* Vaezi-Nejad, S. M.
Siddiqui, A. S., *see* Ferreira, M.
Siddiqui, Z. S., *see* Ferreira, M.
Sigel, G. H., *see* Ding, J. Y.
Simeonidou, D., *see* Ferreira, M.
Sobey, P., *see* Horridge, G. A.
Spooncer, R. C., *see* Jones, B. E.
Stevenson, A. J., and Barr, S. A.: Fibre-optic coupler fabrication at AOFR 127
Stewart, G., Norris, J., Clark, D. F., and Culshaw, B.: Evanescent-wave chemical sensors—a theoretical evaluation . . . . . 227
Strach, S. J., *see* Elias, M. C.
Strobel, R., *see* Bergner, H.
Stuart, A. D., *see* Bryant, G. W.
Takahashi, Y., Tanaka, T. P., and Nakano, H.: Laser noise characteristics in fibre optic analogue transmission . . . . . 565
Tanaka, T. P., *see* Takahashi, Y.
Tanaka, T., *see* Kurata, J.
Tann, J., *see* Xu, Z. Y.
Taroni, P., *see* Cubeddu, R.
Taylor, P. C., *see* Xu, Z. Y.
Tjin, S. C., Johnston, P. R., and Kilpatrick, D.: Flow profile modelling at the immersed tip of an optical fibre and its application to the fibre-optic laser Doppler anemometer . . . . . 117
Tortoishell, G.: The safety of optical systems in hazardous areas . . . . 545
Touam, T., *see* Wu, C.
Travis, A. R. L., and Lang, S. R.: The effects of contrast on time/space multiplexed grey scale in monotonic SLMs . . . . . 301
Turton, B. C. H., Mohebati, A., and King, T. A.: Remote multiplexed fibre-optic laser-diode spectroscopy for gas sensing . . . . . 217
Uchiyama, H., *see* Kurata, J.
Vaezi-Nejad, S. M., and Shiers, D. B.: A fast light source for photogeneration of free charge carriers in time of flight experiments . . . . . 579
Viohl, I., *see* Xu, Z. Y.
von Balley, G.: Holography and endoscopy . . . . . 491
Vukovic, S., *see* Dragila, R.
Vulkova, T., *see* Eftimov, T.
Wade, C. A., and Bennion, I.: A study of fibre-optic techniques for gas sensing 197
Wolfbeis, O. S.: Biomedical applications of fibre optic chemical sensors . . 425
Wong, D., and Chu, P. L.: Comparison of stress distributions between mechanically homogeneous and inhomogeneous fibres . . . . . 65
Wu, C., Touam, T., and Najafi, S. I.: Analysis of Zn-diffused semiconductor slab waveguides: exact solution and WKB approximation . . . . . 365
Xu, Z. Y., Tann, J., Gal, M., Gaughan, K., Viohl, I., and Taylor, P. C.: Optical bistability in a hydrogenated amorphous silicon Fabry-Perot etalon . . 29
Zhao, Y., and Sceats, M. G.: Theory of acoustic sensing using optical fibres 101
